## 2<sup>nd</sup> Grade News

### MATH

During math the children finished learning about measuring and began to explore fractions! They are learning so much about fractions! Over the weekend, discuss with your child fractions we encounter on a daily basis (for example eating pizza)!

### Reading

Instead of focusing on a reading story this week, we have been doing a ton of writing and typing. The kids wrote I Wish poems, short stories, compared and contrasted friendships, and lastly, they concluded the week describing the best part of them.

Take time and enjoy a great book this weekend.

### Science

The kids learned how cutting, shaping, and mixing things changes matter. They also learned how water can change into a solid, liquid, or gas. Lastly, they learned how some changes in matter are reversible or irreversible.

### Language Arts

We reviewed several key concepts such as:

Phonics/spelling: -ore, -or, i\_e, igh, i sounds

Grammar: pronouns, adjectives, and commas

### Reminders

April 1<sup>st</sup> – No School, teacher workshop

Dress your child for the tricky weather

Have a great and safe weekend,  
Mrs. Rocheleau
